RAD-ICAL GROWTH: AITX Q2 PERFORMANCE SOARS SKYWARD

We are pleased to announce a significant uptick in our Q2 results for FY 2024. We've recorded an outstanding 343% increase in device orders compared to Q1.

Of the 155 devices ordered this quarter, a striking 90% were versions of RAD's renowned ROSA™. The rest comprised ROSA standalone units, RIO™ 360, RIO 180, AVA™, and one SCOT™ unit. Additionally, 59% of these orders were secured through RAD's dealer channel.

This upward trend not only showcases RAD's dedication to innovation but also the burgeoning trust our clients have in our solutions. As we continue this momentum, we anticipate a robust rise in our Recurring Monthly Revenue (RMR), positioning us closer to a potential annual revenue of \$10-12 million.

"These robust figures are a testament to RAD's commitment to innovation and the trust our clients place in us." ~ Steve Reinharz

CLASSROOM 2.0: WHERE ROBOTS TAKE ATTENDANCE AND CHASE TRUANTS!

Kumamoto, a city in Japan, is addressing rising truancy rates by introducing robot assistants in classrooms. Two robots, equipped with cameras, microphones, and speakers, will debut in November, facilitating remote learning for absent students. These 1-meter tall robots, connected to students' laptops, will allow them to virtually participate in lessons and discussions.

"Not limited to the classroom, the robots can roam school grounds and engage in events. This initiative responds to growing truancy, exacerbated by the Covid-19 pandemic, with 2,760 students absent in the 2022 academic year, up from 1,283 in 2018. The robots aim to reduce students' anxiety, encouraging a return to physical classes.

SECURITY ON A MISSION

AITX & RAD at GSX 2023: Showcasing the Future of AI-Enhanced Security

We're excited to share that we'll be making a significant appearance at the renowned Global Security Exchange (GSX) Conference from September 11-13 in Dallas, TX. Our CEO, Steve Reinharz, along with key members of our board, will be participating in a crucial panel on September 12. They'll discuss the transformative role of Cybersecurity, Edge Analytics, and AI in shaping contemporary physical security systems.

At GSX, we'll be proudly showcasing our groundbreaking security solutions, including ROSA™, AVA™, and the newly-evolved RADDOG™. In collaboration with ECAMSECURE, a GardaWorld company, our award-winning AVA will be demonstrated as the Virtual Gate Guard™, offering enhanced access control at a fraction of traditional costs.

Visitors can experience our innovations at GardaWorld booth #3619 and the Apex Assured booth #1749. As we expand, our collaborations with esteemed partners like Allied Universal® in Richardson, TX, are enhancing our dealer network, promising a future filled with more advanced, integrated technologies. We look forward to continuing our journey with you.
